WHAT IS WX-COIN

WX-COIN is a decentralized cryptocurrency that uses peer-to-peer technology to operate with no central authority or banks, managing transactions and the issuing of WX-COIN is carried out collectively by the network. WX-Coin is open-source, its design is public, nobody owns or controls WX-Coin and everyone can take part.

INTRODUCTION

For almost 3 years, WXcoin has been running and developing as a mining company. We already have more than 150,000 members, And now it's time we did the development project by launching WXC Cryptocurrency.

Cryptocurrencies have already changed the world over the past few years, but here at WXCoin, we want to evolve things even more. While it's true that many cryptocurrencies incorporate blockchain technology, several of them don't use it to the best of its abilities.

WXCoin will release 31 million coins worldwide, which is similar to an economic system based on deflation and with increasing supply of currency, the WXCoin trends increase while demand is high and the amount of coins still does not increase.

WXCoin vision that investors have total control over their finances. This is able to occur because it works as part of a peer-to-peer community. Therefore, it's a totally decentralised cryptocurrency ecosystem. Without banks or financial institutions involving themselves, all WXCoin users have financial freedom. This also provides a much safer way of investing. Due to the decentralised system, identity theft and other fiat currency problems aren't an issue.

WXCoin holders will be able to make investments with such in a number of different ways, thereby increasing the value of the coins that they hold. These investment opportunities include Mining, Trading and Staking. The value of all cryptocurrencies is generally something that is determined by numerous factors. This includes supply and demand, perception and of course, factors of the economy. Because of this, WXCoin and the blockchain market have extensive room to grow in a significant way. The sooner you invest, the lower the price of the coin, and then you're simply able to watch it rise in value.

Our system would effectively assist in obtaining the maximum profit safely, securely, comfortably and steadily. We have dramatically simplified investing by linking the profit to the exchange rate of our coin. The one and only thing you need to do is to purchase our coin either at ICO (which is cheaper) or at fully-fledged launch of the platform.

To put it simply, WXCoin is a self-regulated financial system, which is able to provide multiple investment opportunities and financial independence to investors. This all takes place within the WXCoin community, containing peers who are like-minded and able to push the WXCoin brand to become one of the best cryptocurrency alternative in the future.

Why WX-Coin?

Payments are fast, global, and secure with near zero payment fees. Therefore merchants do not have to pass on the cost of business to you the customer, meaning you are able to enjoy spending less on the things you love

Where to buy?

Once you've got yourself a wallet for storing your WX-Coin, you can register an exchange and start filling up your wallet with WX-Coin of your own.

Where to spend?

Everyday, more merchants are accepting WX-Coin as a payment option. The tiny fees allow vendors to sell cheaper than with traditional currencies.
